Service Interruptions:

- None reported.

WEATHER OF CONCERN

Weather of Concern

- Very hot temperatures for early May should result in record high temperatures on Sunday for portions of Southern California. An Excessive Heat Watch is in effect for much of the lower deserts, which means heat could reach dangerous levels for anyone exposed too long outdoors.

Active Weather Warnings, Watches and Advisories by County:

- <http://www.wrh.noaa.gov/hazardSummary/?state=ca&bycounty=1>

WEATHER SYNOPSIS BY REGION

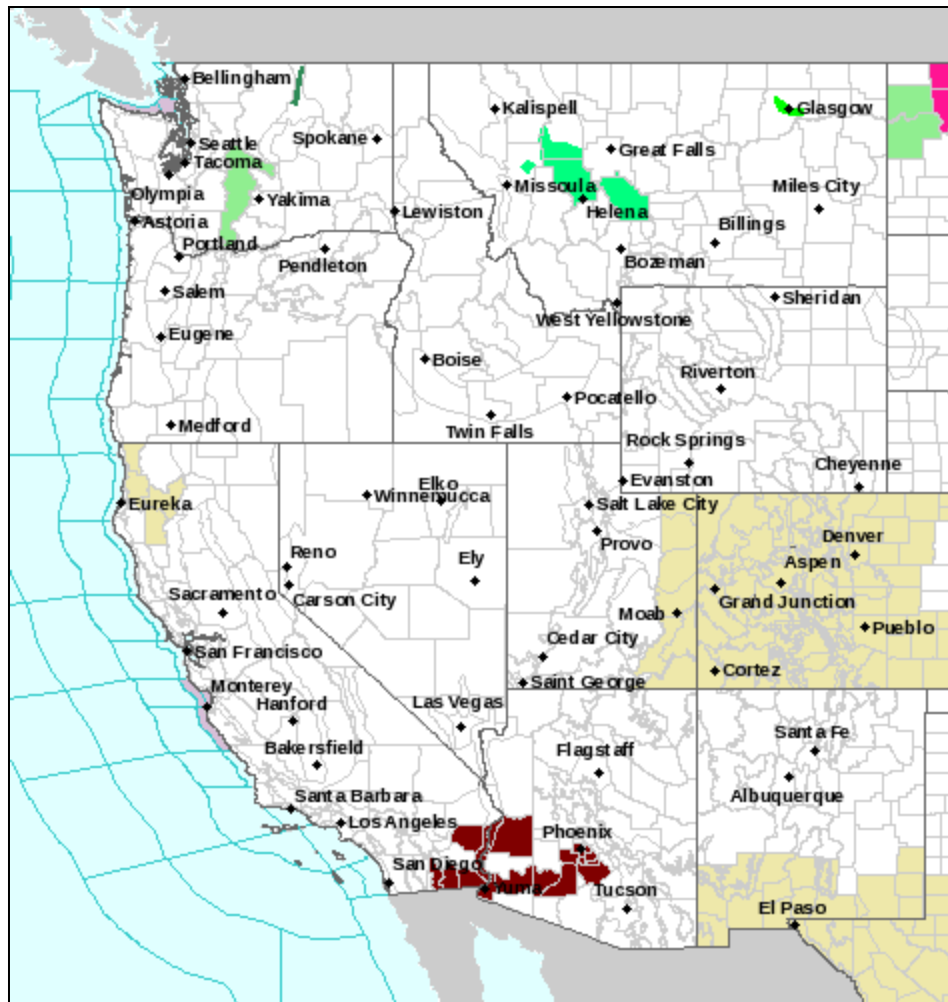

NORTHERN CALIFORNIA

A ridge of high pressure will build over the region the next few days bringing warm, fuel-drying weather. Temperatures will remain around the mid to low 80s, with the warmest temperatures still around 8-10 degrees above normal in the inland valleys. Light winds will remain southerly to westerly for several more days. A few showers are possible in the Northwest (NW) mountains Saturday night through Sunday night as a weak weather system moves through the region. Cooler temperatures are not anticipated with this system. Warmest areas are expected to be around the 90s on Monday with pressure returning briefly over the region. A few showers are possible again in the NW areas late Tuesday into early Wednesday from another weak weather system.

SOUTHERN CALIFORNIA

A ridge of high pressure will build into California from the Pacific Ocean bringing substantial warming and drying to the region through Saturday. Temperatures will warm to the upper 60s and 70s across the mountains and mid 80s to low 90s in the valleys Friday with a few more degrees of warming Saturday away from the coast. Minimum humidity will drop between 15% and 30% Friday. The ridge of high pressure will weaken bringing a few degrees of cooling to the region Sunday and then there will be little change in the temperature through early next week. Minimum humidity will be mainly in the teens above and inland from the marine layer Saturday through early next week. A Pacific trough may drop down the West Coast bringing a more significant cooling trend to the area starting Wednesday. No rainfall or significant winds are anticipated over the next week.
